T1A2 - Portfolio

About my website

My portfolio website is to show who I am to potential employers and clients. I started with a few ideas from other people's portfolios, and wire framed out a design. Started with a mobile first design, and worked off responsiveness from there, then added animations last to make the site more interactive.

Challenges

- Trying to individual and not copy another person's style
- Finding free to use images

SiteMap

# Tech Stack Used

Home Page

- Media queries separate css
- Responsive
- Menu changes
- Hamburger menu
- Clickable link
- Hover on desktop icons
- Mobile no hover queries
- Current page non clickable
- `<div><nav><img><ul><main>`

About Me

- Information about myself
- Header images for each page
- <div><nav><img>

- Blog master page
- Blog Cards have hover animations
- No hover on touch devices
- Splits off to separate pages
- Hover to reveal information
- Card layout
- <div><nav><img>

Blog Page

Blog Posts

- Independant blog pages
- Image as main item
- Header self aligns
- <div><nav><img>

- Showing bodies of work
- Work links on bottom for mobile
- Images of sites with description
- `<div><nav><img><ul><section><footer>`

Work Page

Contact Page

- Contact information
- Contact form direct to email
- Resume download
- <div><nav><img>
<form>
